Our goal is to deliver premium quality software development services and products while giving unmatched value to enterprises worldwide at an affordable cost. We believe in "Customer Satisfaction is Our Satisfaction".

ABOUT **IMS [Inventory Management System]**

IMS is a web based online ERP software solution specially crafted by Excelanto for Educational institutions.

The software is highly modular and supports the end to end business functions of a typical Educational institution.

IMS is highly adaptive. The ERP solution can be used, with minimum customizations, by any type of institution with different education system. IMS is highly flexible and configurable and is capable of addressing the needs varying curriculum, syllabus and examination formats and seamlessly integrate the business processes.

IMS is powerful enough to create application spaces for different institutions under the same business group. In other words, a single installation of IMS can be used by different institutions having individual sets of data. The system provides adequate measures to keep institutional data separate.

The system allows the user to define criteria to select students. Criteria can be set based on economic and social parameters. The criteria also define the cut-off score required of any particular group profile.

INVENTORY MANAGEMENT

Maintenance of stock is a critical task as it has accounting implication as well. Stocks are maintained in different locations in stores. There can be multiple stores with unique identification. System allows the user to easily look up stock items in any store and also know stock position. Individual items are defined with unit price and re order information. Alert is issued, as e mail, to the concerned should net stock quantity fall below re order levels. Vendor data is maintained and details of items supplied by them are also kept in the system. Requisitions are authorized by privileged users.

DATA IMPORT/EXPORT

IMS facilitates bulk data import from Excel files by providing predefined Excel formats. This facility is very useful for loading student or Library data.

User may find it tedious when data to be entered is voluminous. Systems offer an easy way by allowing users to enter data in Excel format and later import it into the system. The System takes due care to validate the data before its accepted.

STUDENT DATA SHEET

This is an option for the Senior managers to view the full particulars of a student including full profile, examination performance, attendance records, conduct records and more...

FLASH NEWS

This feature is available to the senior managers to know the current events. This may include admission status, examination results, fees collected, fees outstanding, staff joined and more.

The information is displayed in a marquee that scrolls across the screen. A control panel is provided to upload the information to this feature. Some of the news options are predefined, which are fetched from the Database. Others are custom defined where user enters what is to be displayed.

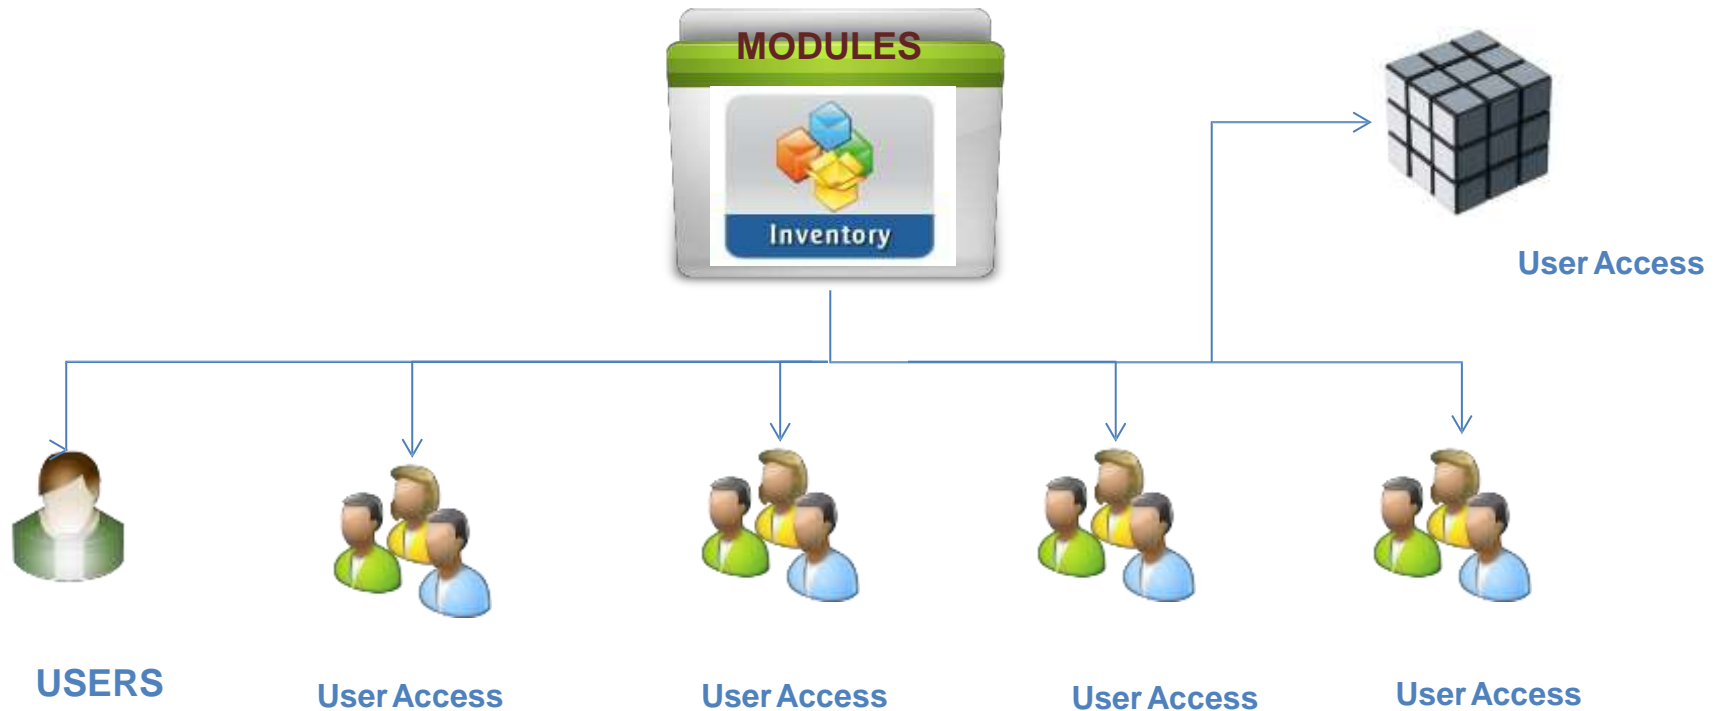

ACCESS LOG

This provides details of system usage by various users. System captures information such as IP address , user ID and access time.
